

# THE LIQUIDITY LAYER FOR MANTLE NETWORK

# INTRODUCING

Crust Finance is a decentralised exchange and automated market maker built on Mantle network focusing on providing efficient token swaps and deep liquidity for stablecoins and other assets.

Crust Finance comes with a unique governance structure using the ve(3,3) system that provides the possibility to maximise gains for all users of the ecosystem.

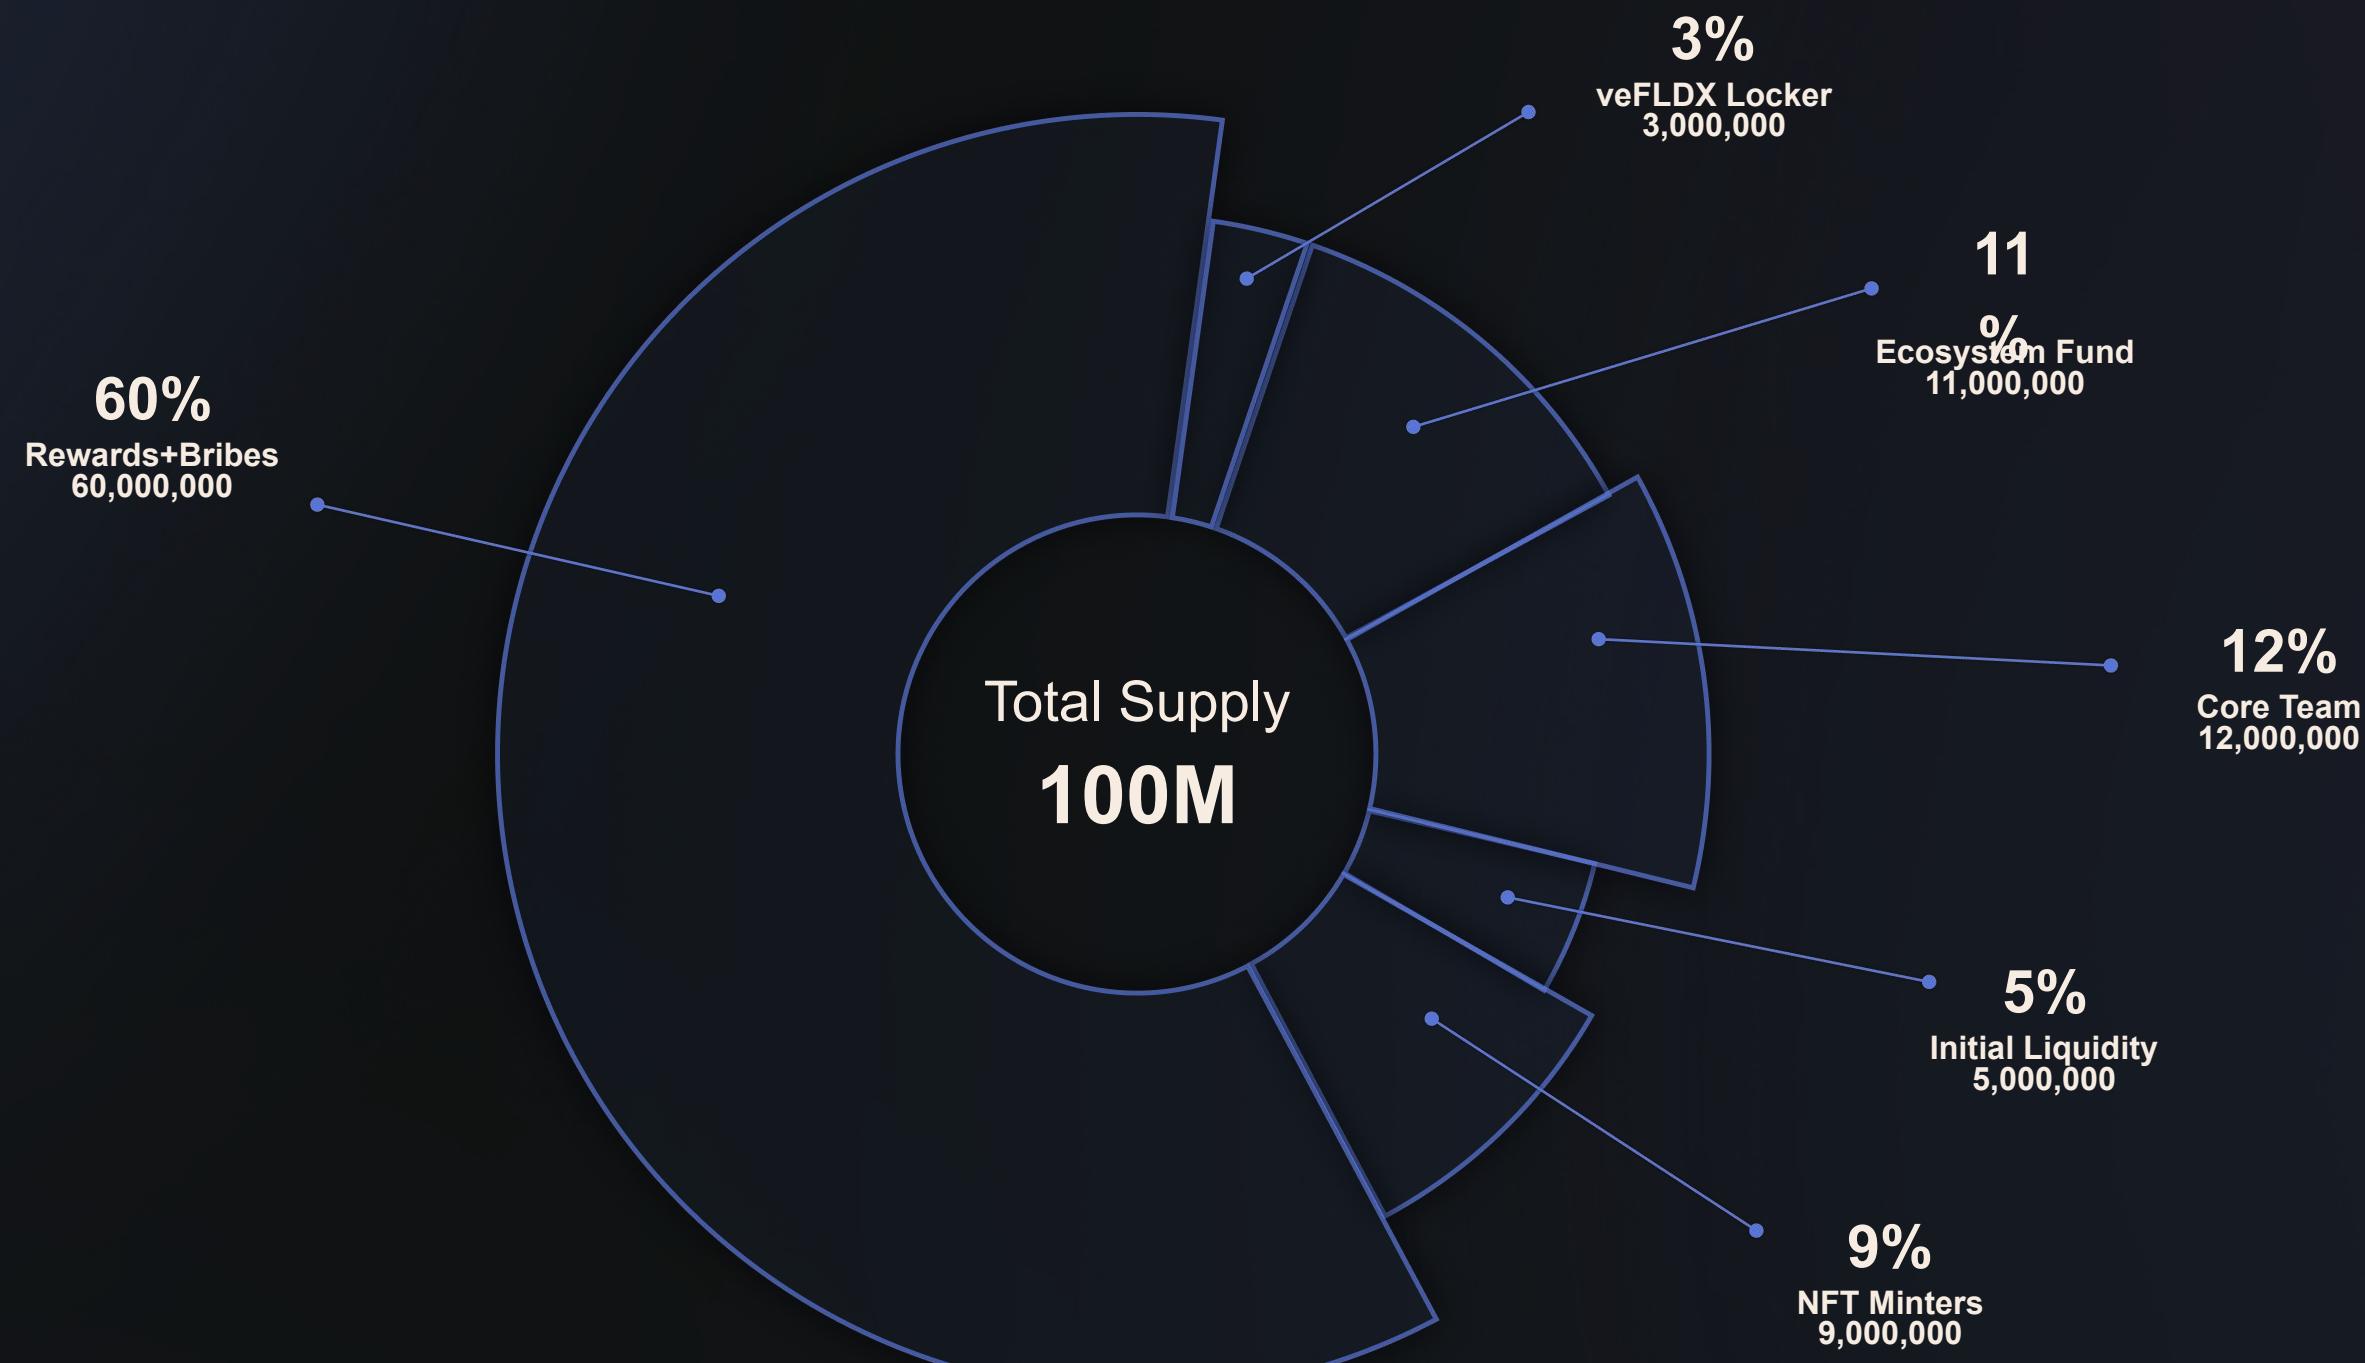

# INTRODUCING

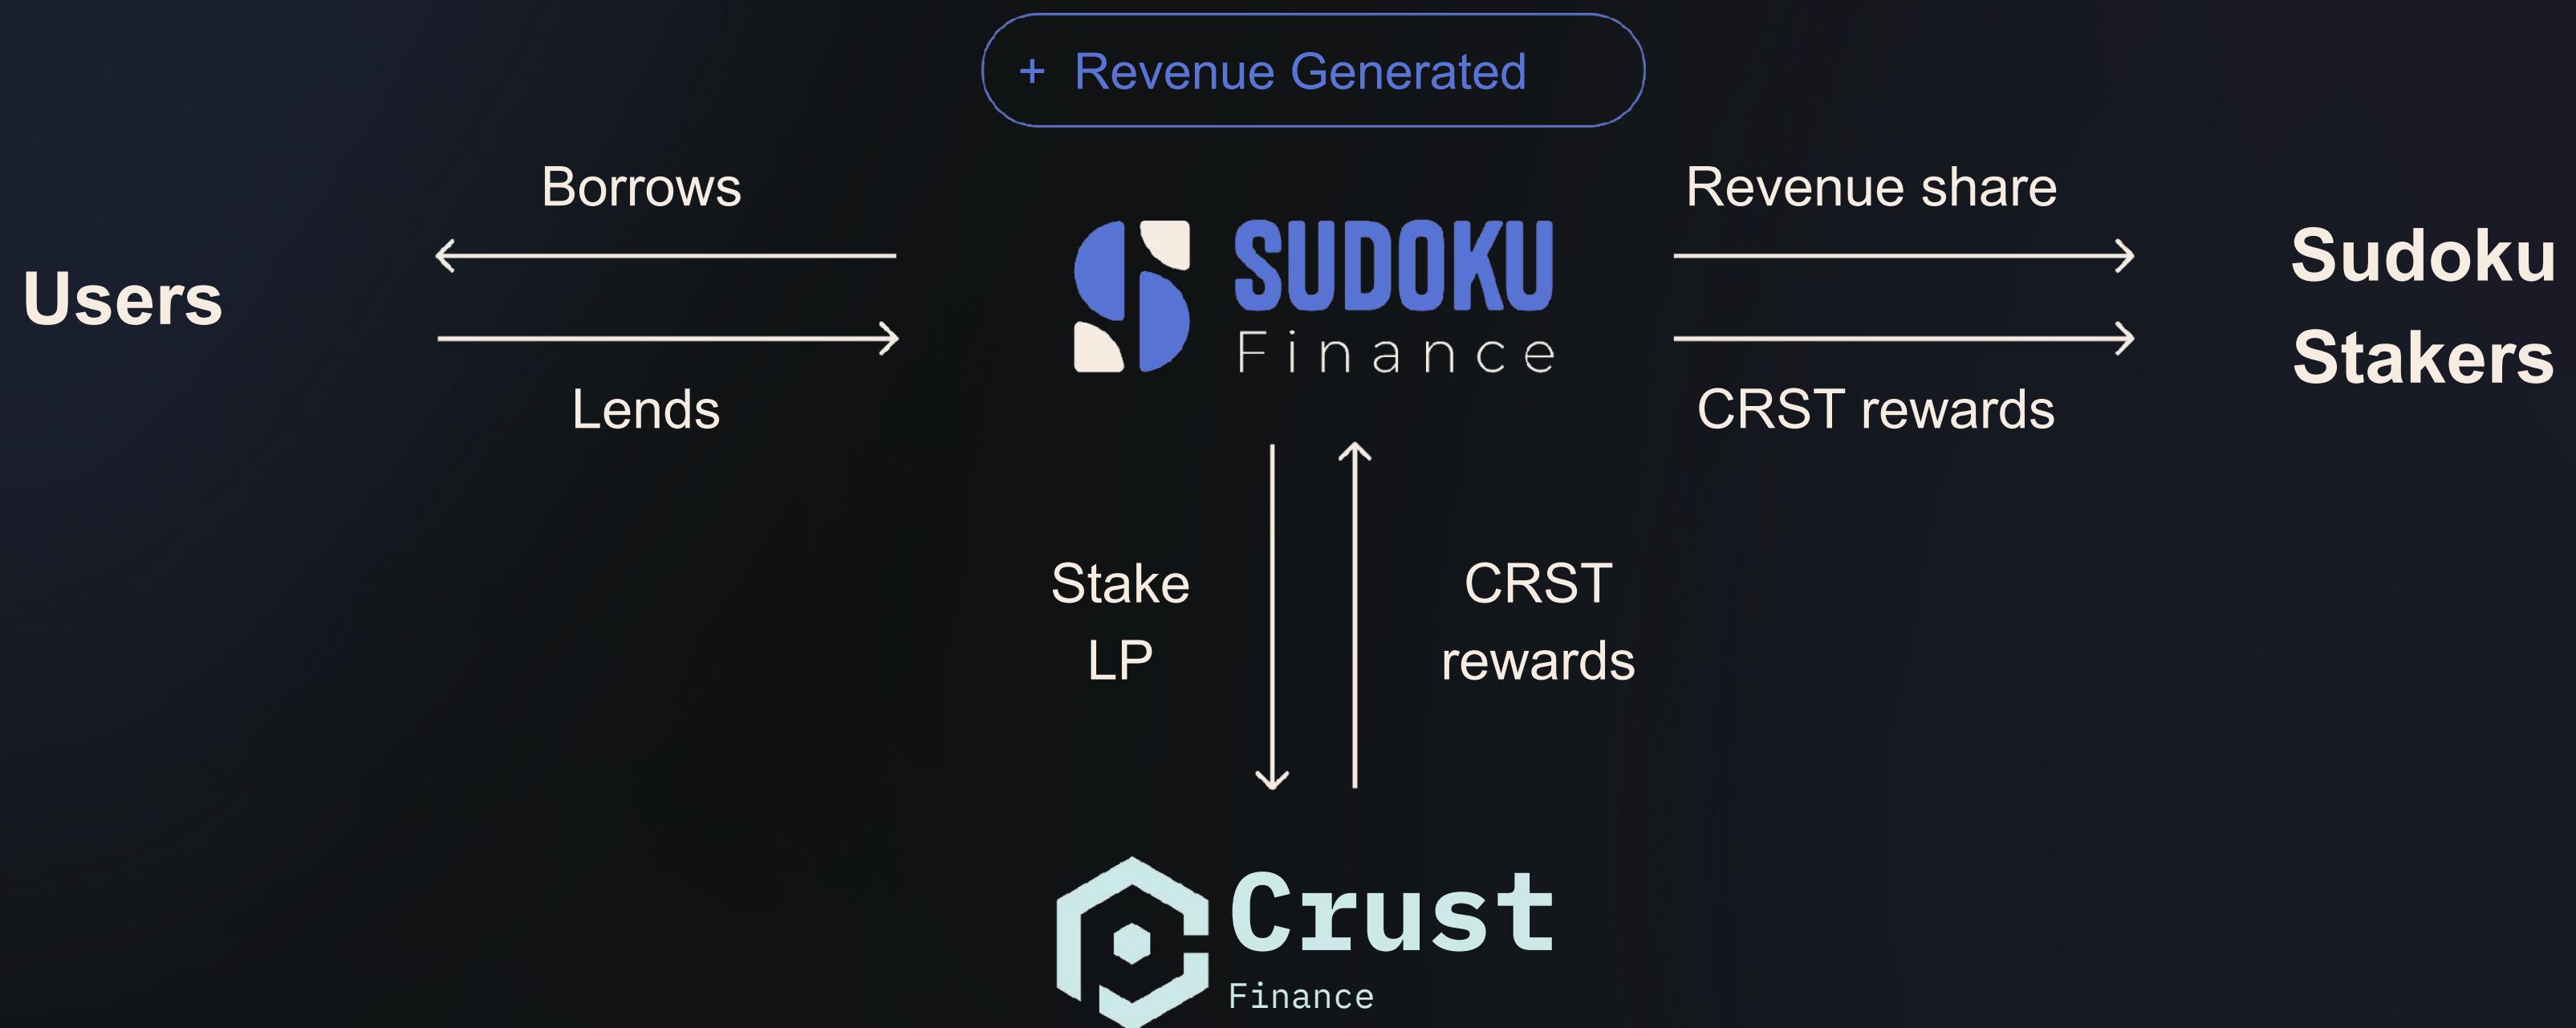

Sudoku Finance is an EVM compatible lending/borrowing protocol built on top of Mantle Network. Sudoku Finance provides peer-to-peer lending solutions that are fully decentralised, transparent and non-custodial.

Similar to (and based from) existing lending platforms like Compound Finance and AAVE users will be able to lend any supported assets on our platform, and use their capital to borrow supported assets.

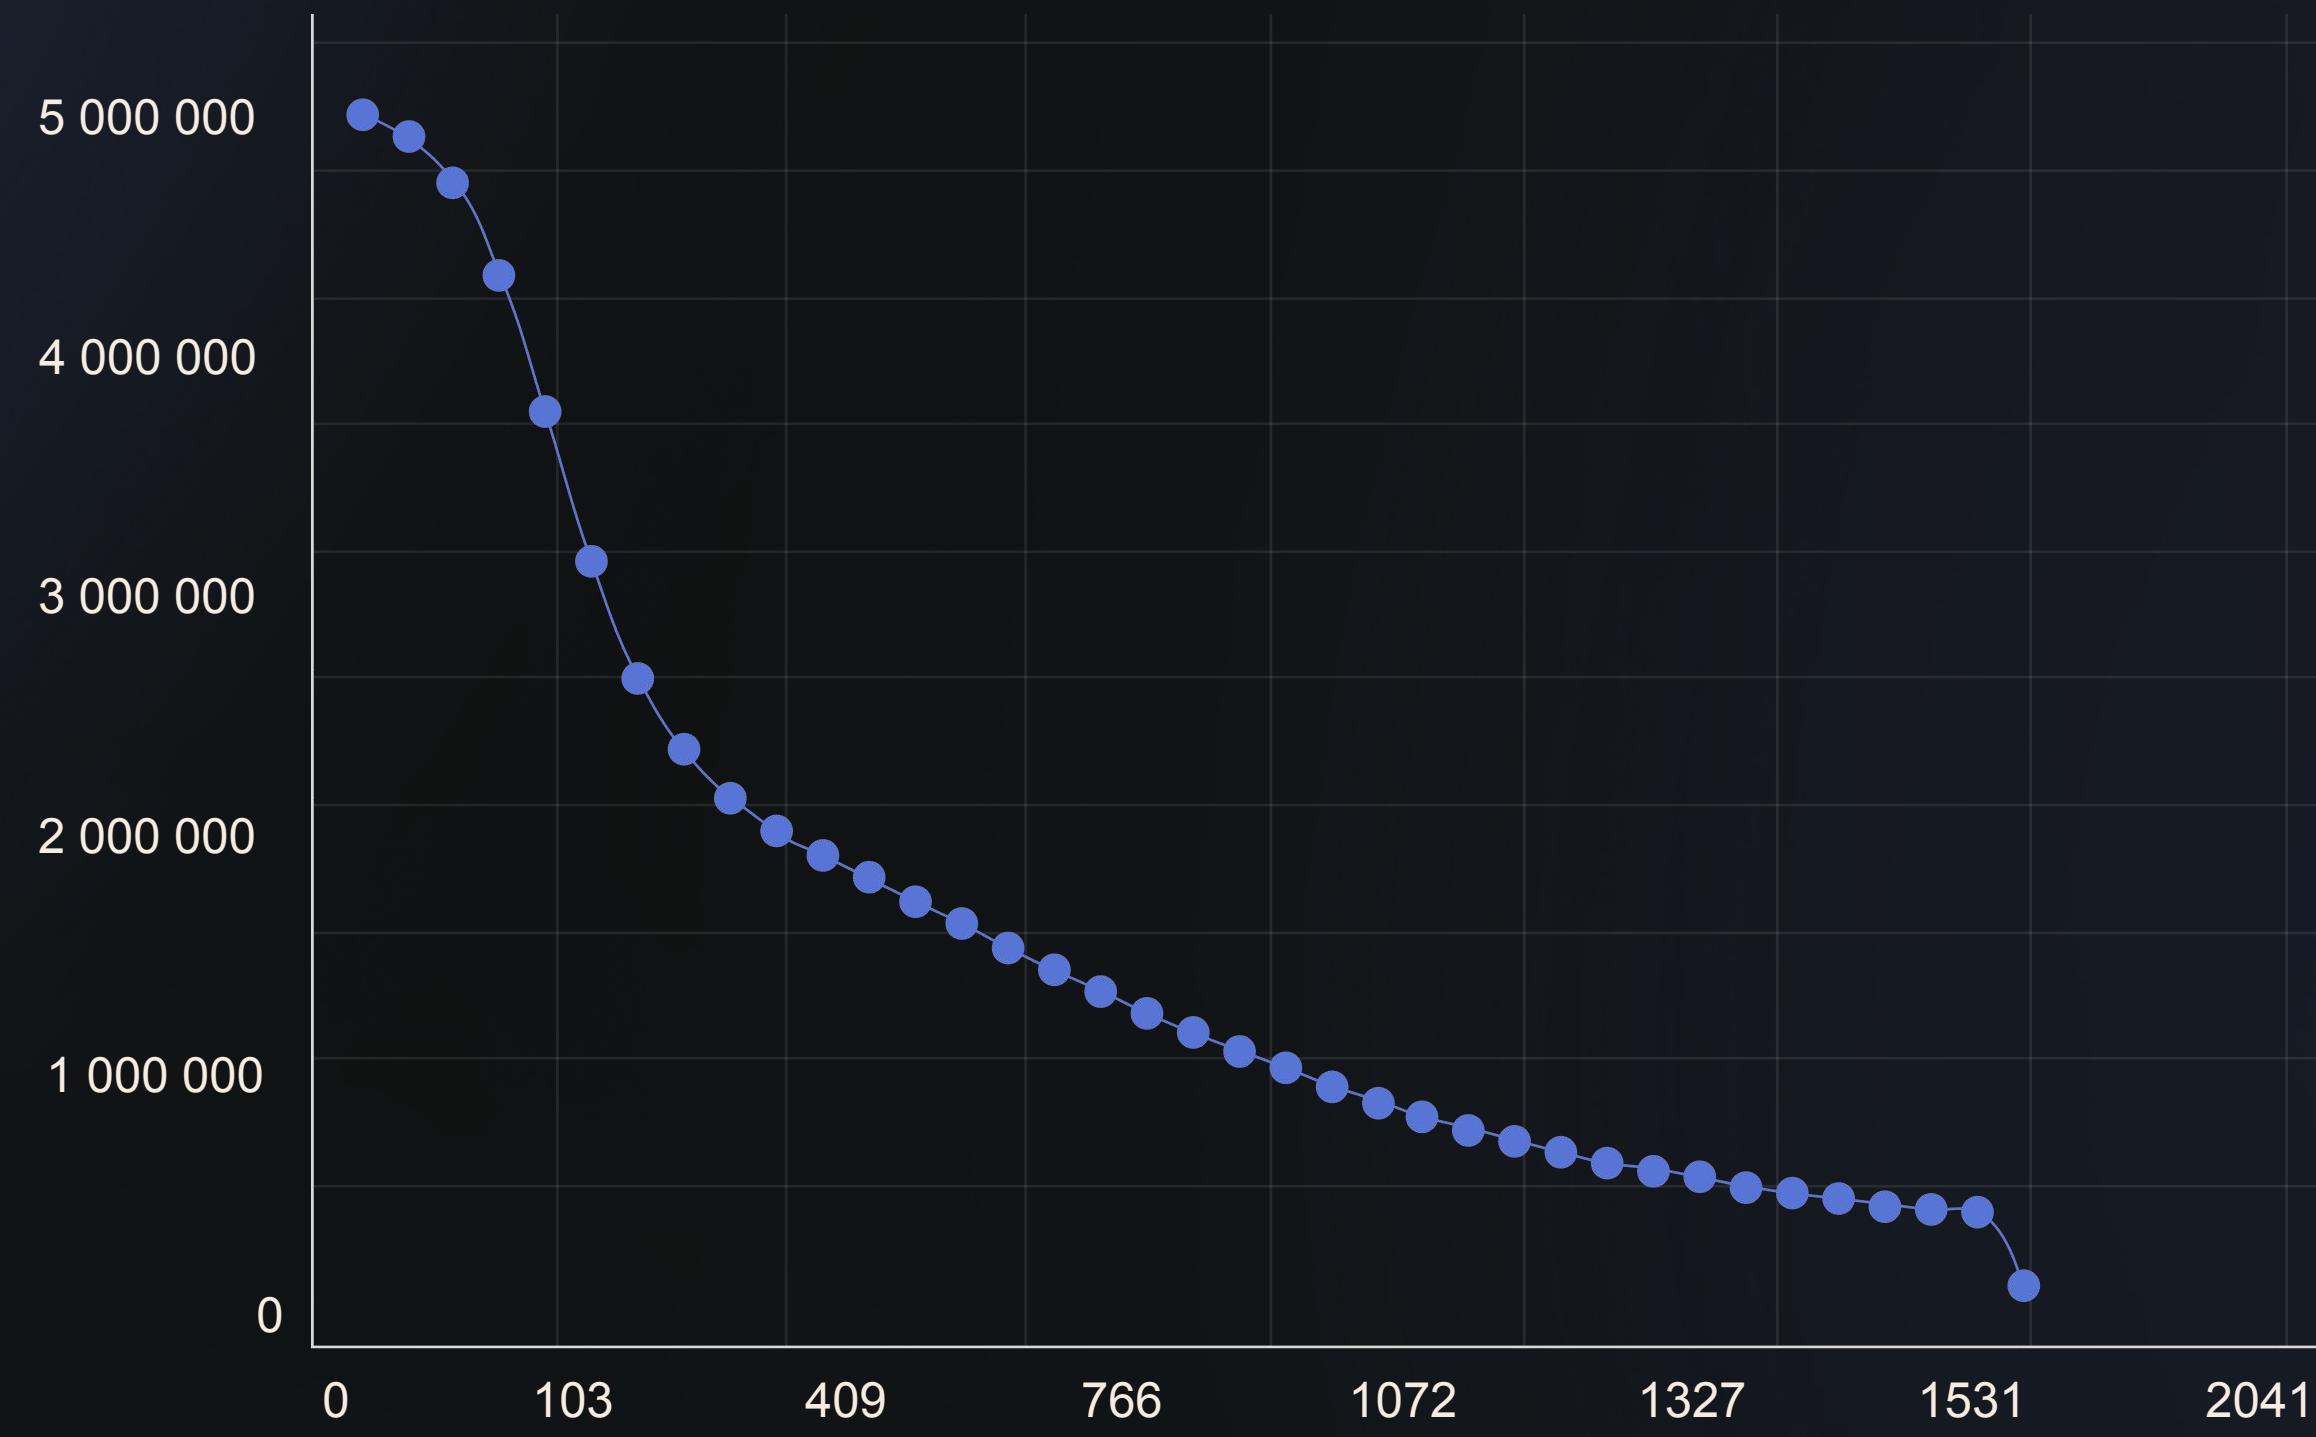

# SUDOKU TOKENOMICS

# SUDOKU STAKING

# SUDOKU EMISSIONS

# WHY CRUST FINANCE

Supports Volatile and Stable Swaps With Very Low Slippage

Dex with minimal Fees of just 0.2% for vAMM and 0.04% for sAMM

Support uniswap style LP and curve inspired gauges for better liquidity incentivization

Permissionless access to create bribes on any LP pools

Fully Decentralised with  $\text{ve}(3,3)$  NFT Holders control the protocol, revenue and token emissions.

Premier launchpad for projects building on mantle network.

Built with a modular architecture that combines an optimistic rollup protocol with an innovative data availability solution using EigenDA.

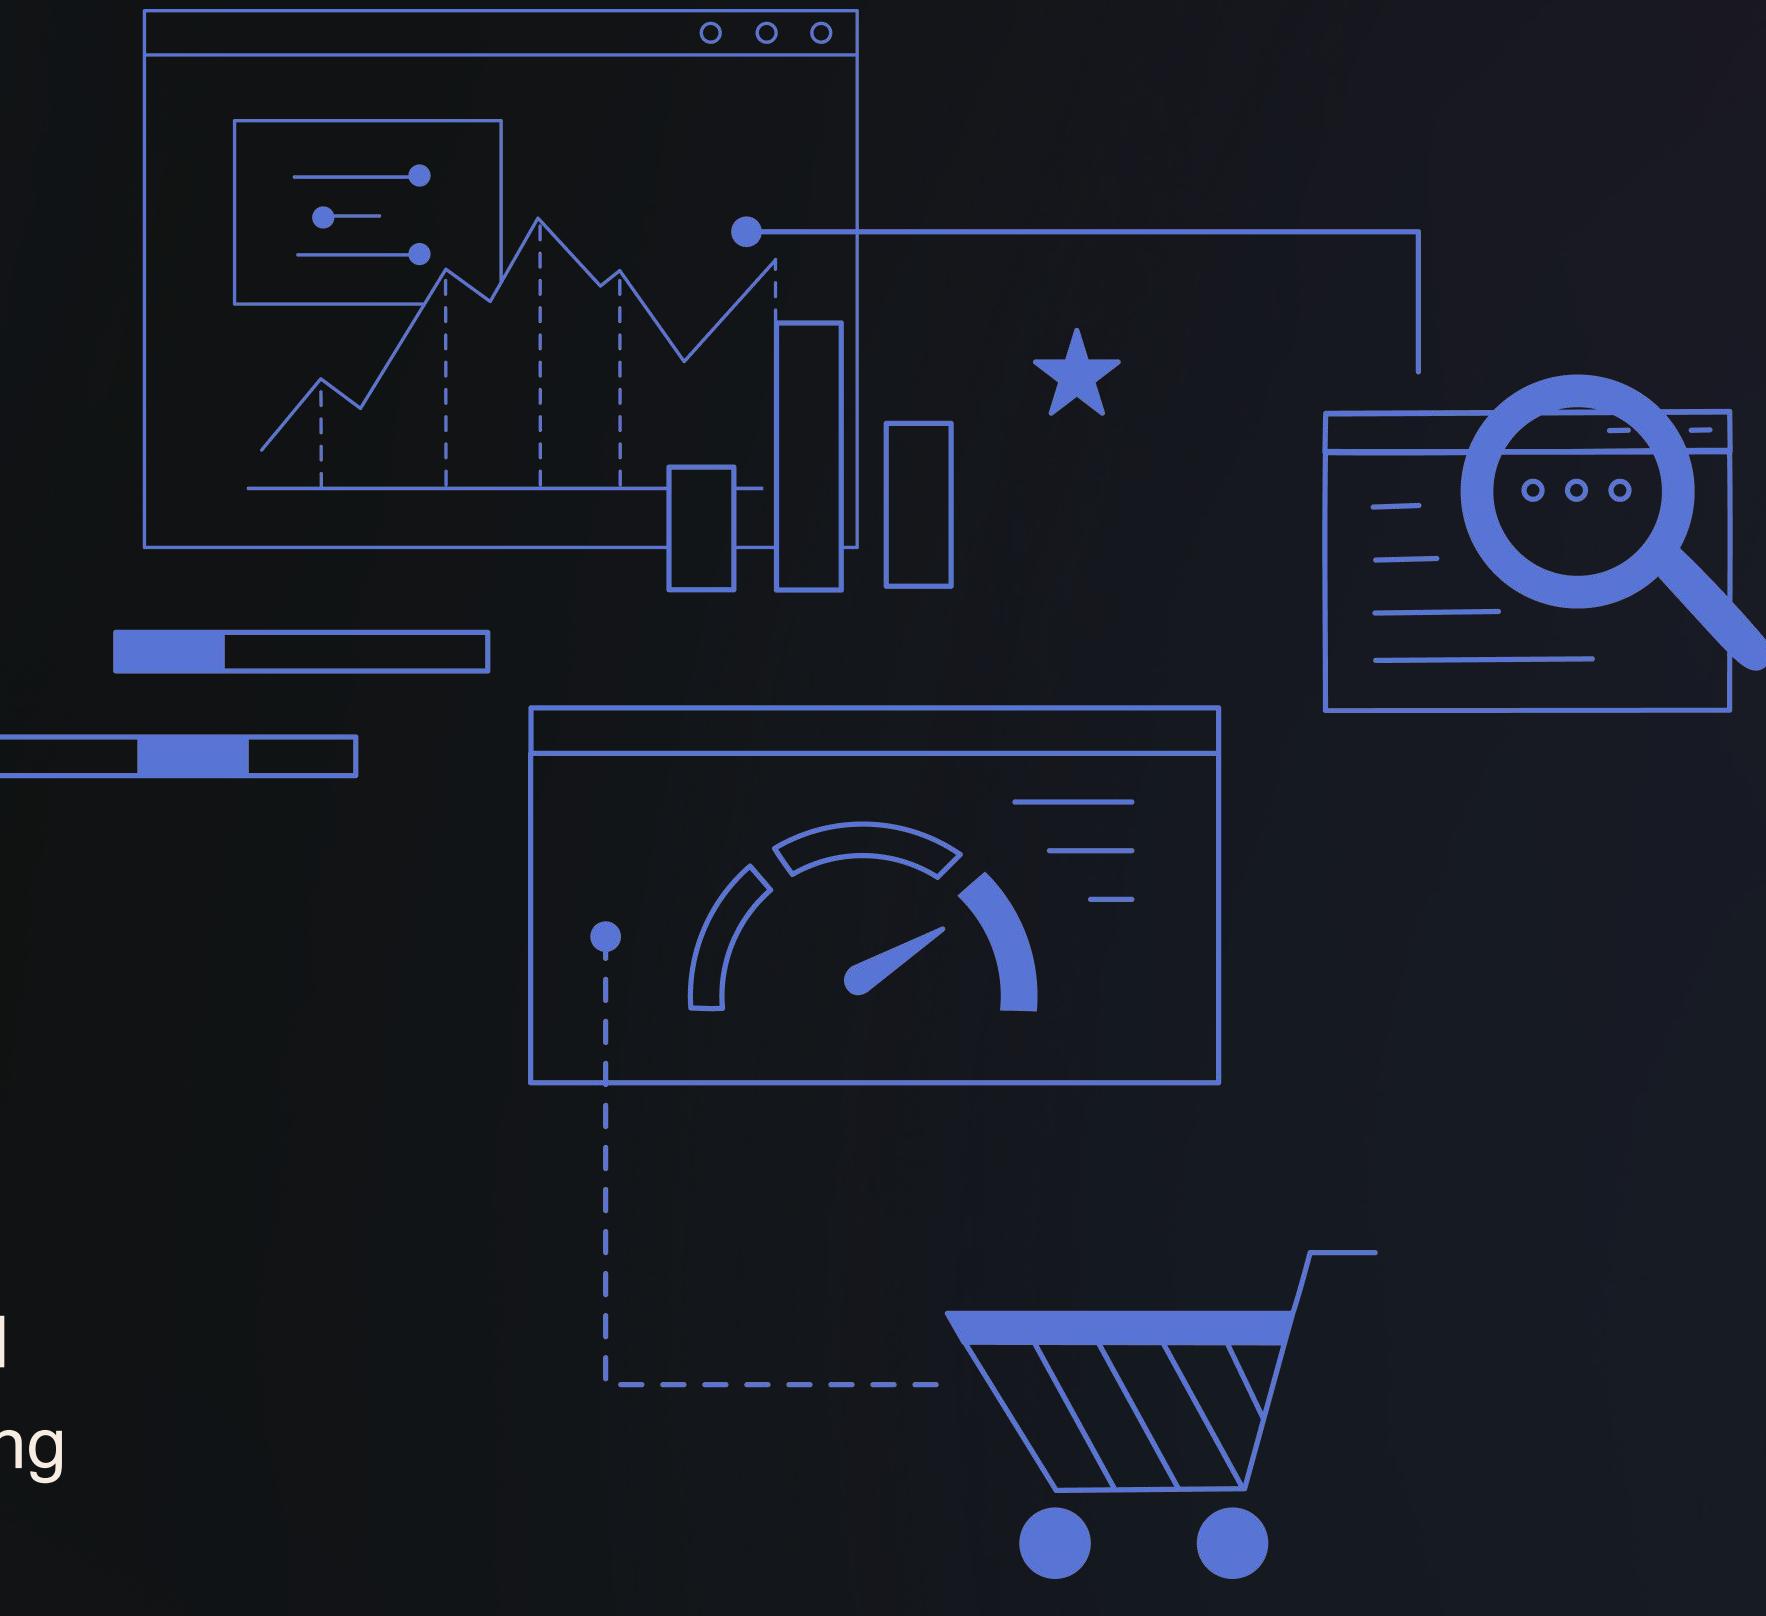

## WHY MANTLE

Future innovative products like mantle LSD which has potential to boost the entire DeFi landscape.

Backed by Bybit and mantle DAO with more than 100M is ecofunds.

# ROADMAP

## Concentrated Liquidity

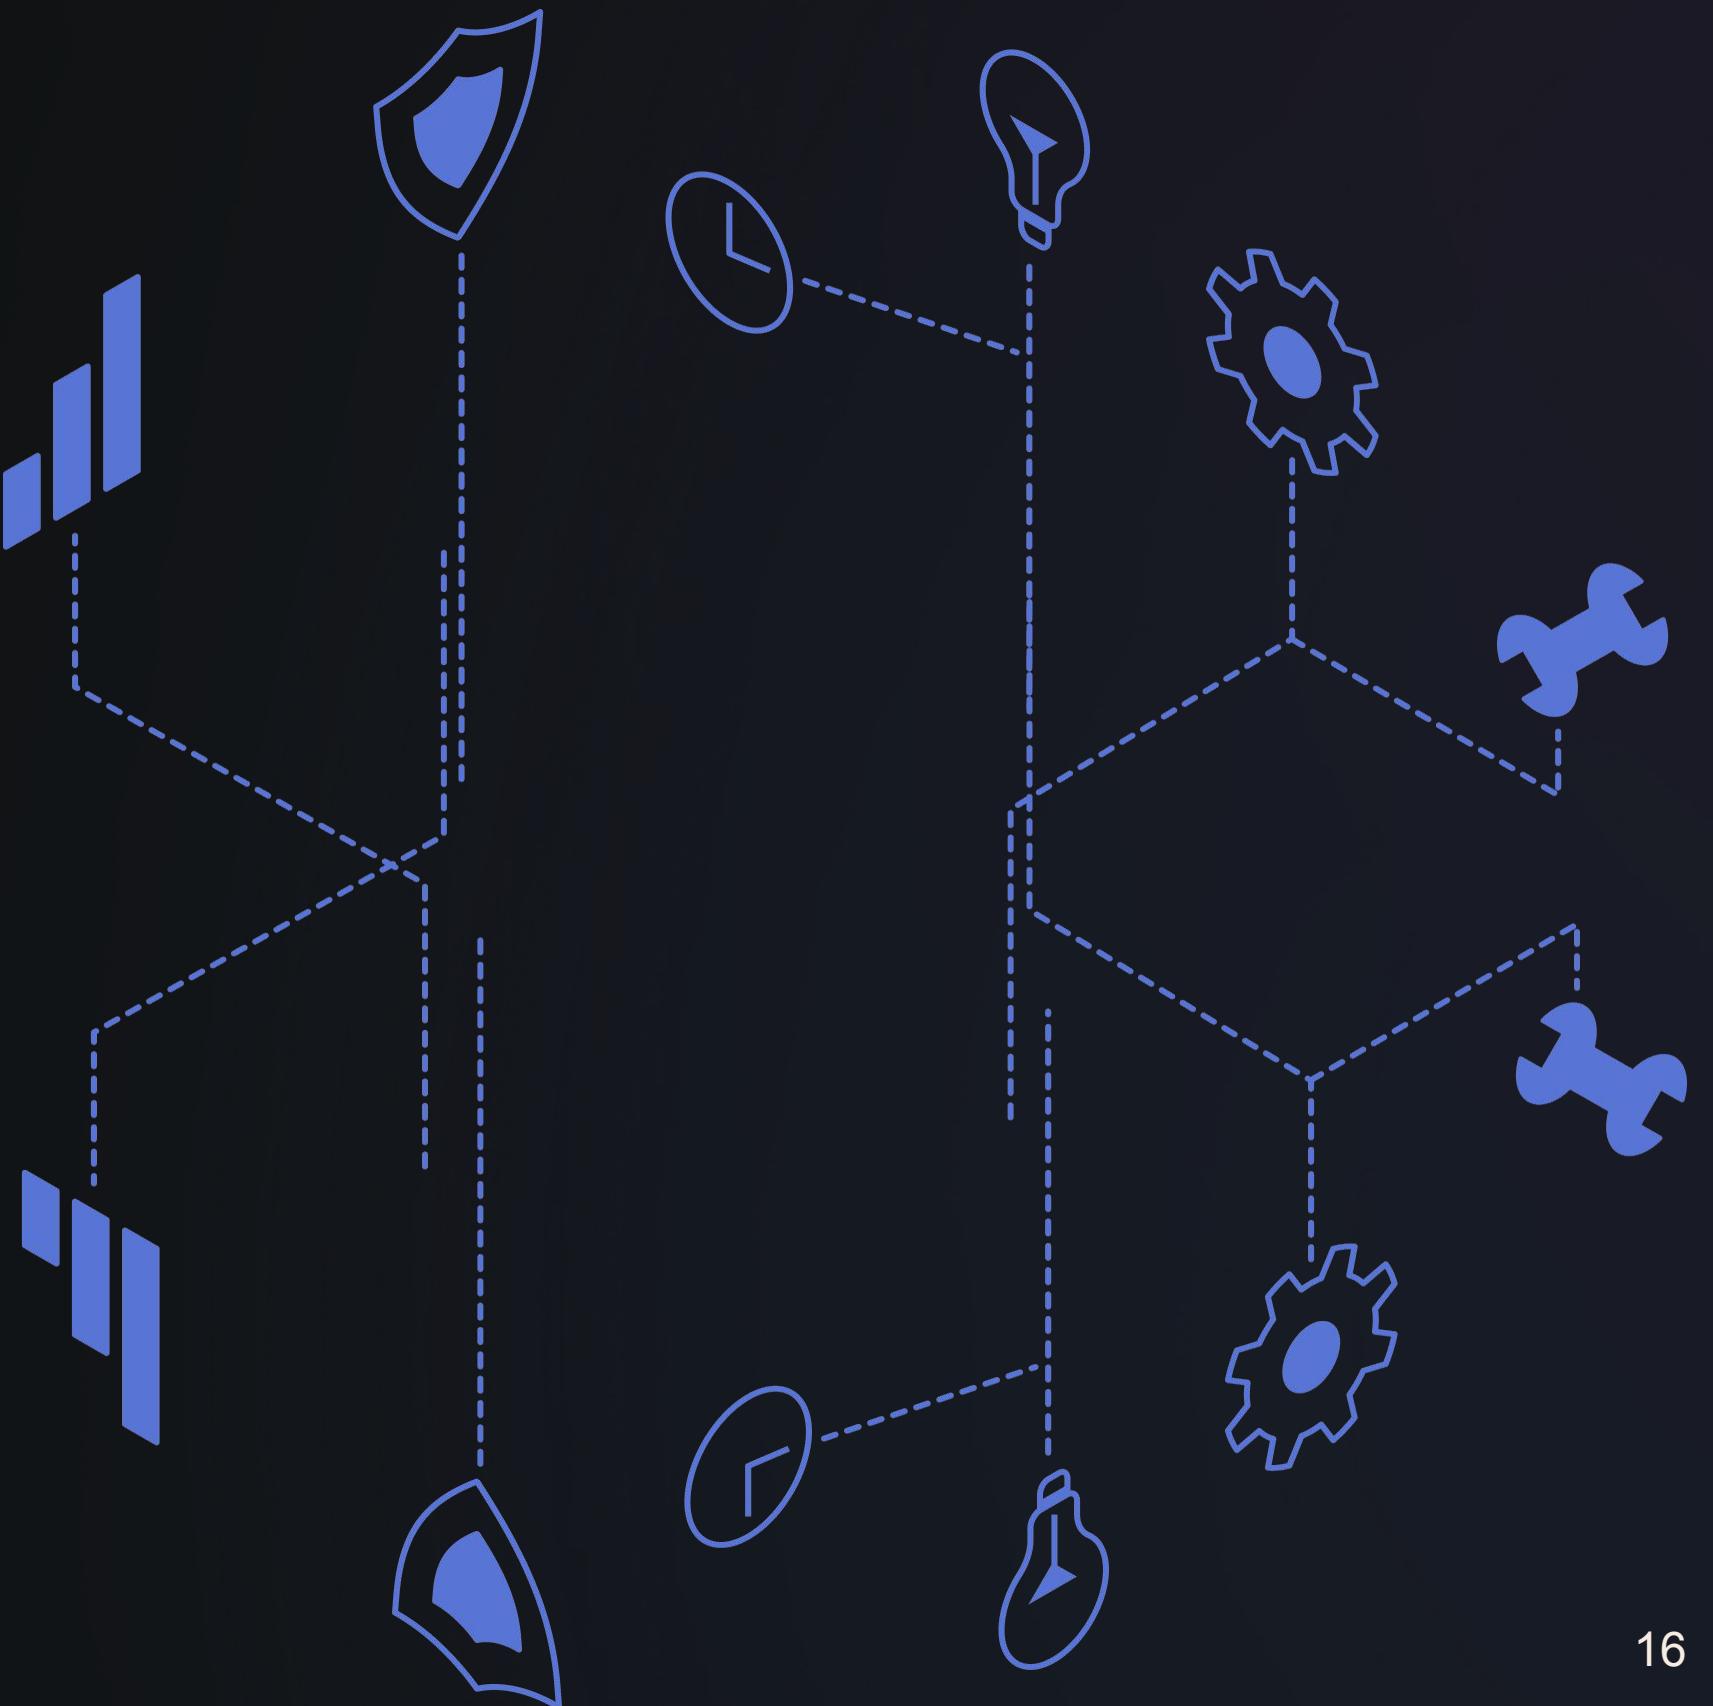

Bring the highly efficient concentrated liquidity solution to crust Finance, along with a noble ALM for passive liquidity deployment.

# ROADMAP

## Tranches

Tranche splits any yield bearing token into two new assets; a fixed-rate asset that manages risk, and a variable-rate asset that maximizes returns.

Our unique Tranche solution will help manage risk and provide consistent returns for Crust and Sudoku.

# THANK YOU

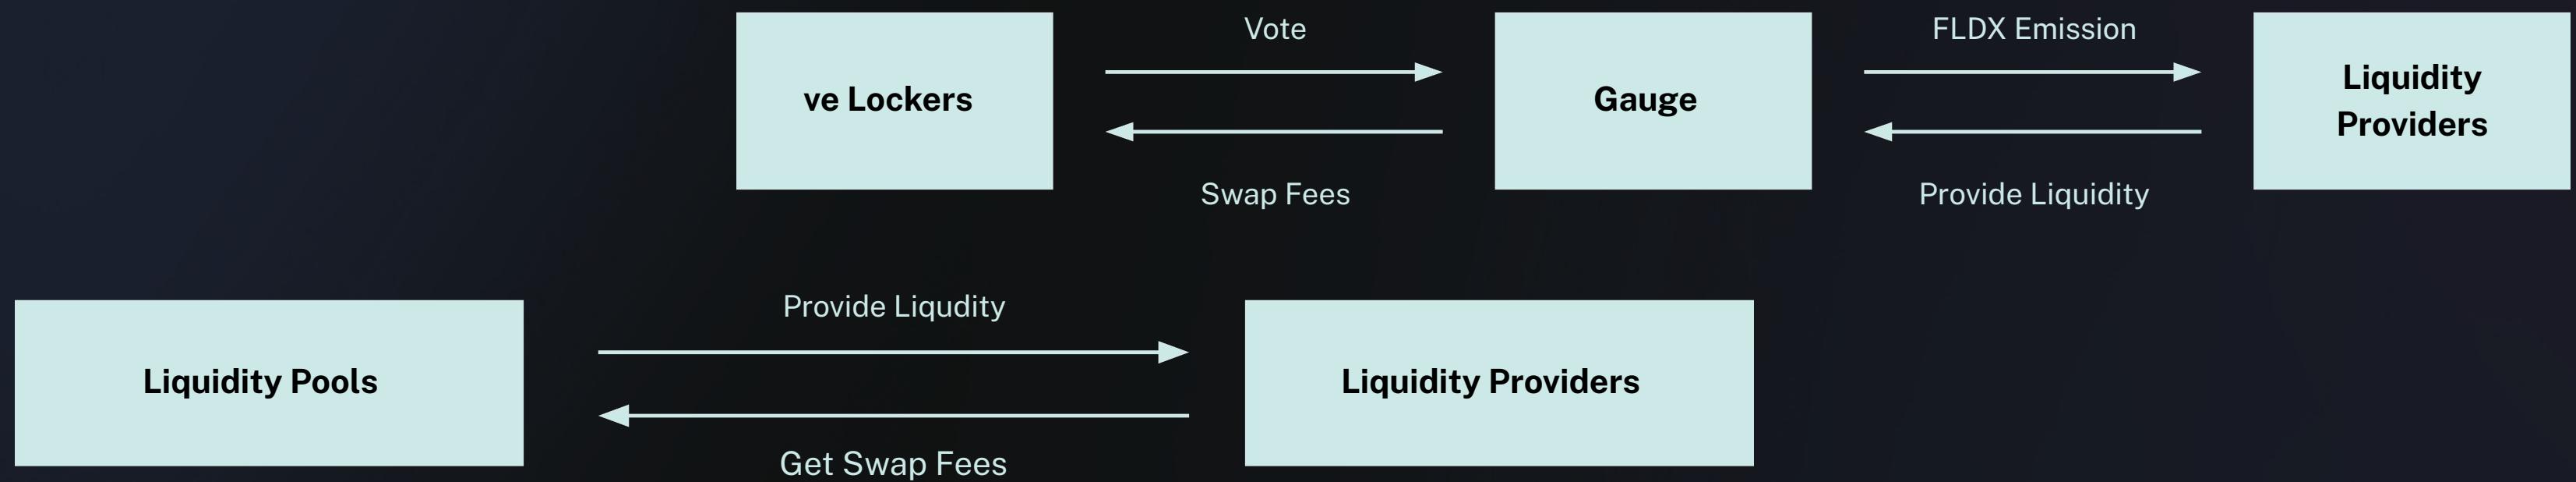

# SWAP MECHANICS

Flair Dex Supports both uniswap style volatile swaps as well as curve inspired stable swaps with very low slippage.

Minimal Fees of just 0.3% for vAMM and 0.05% for sAMM

# GAUGES AND LIQUIDITY

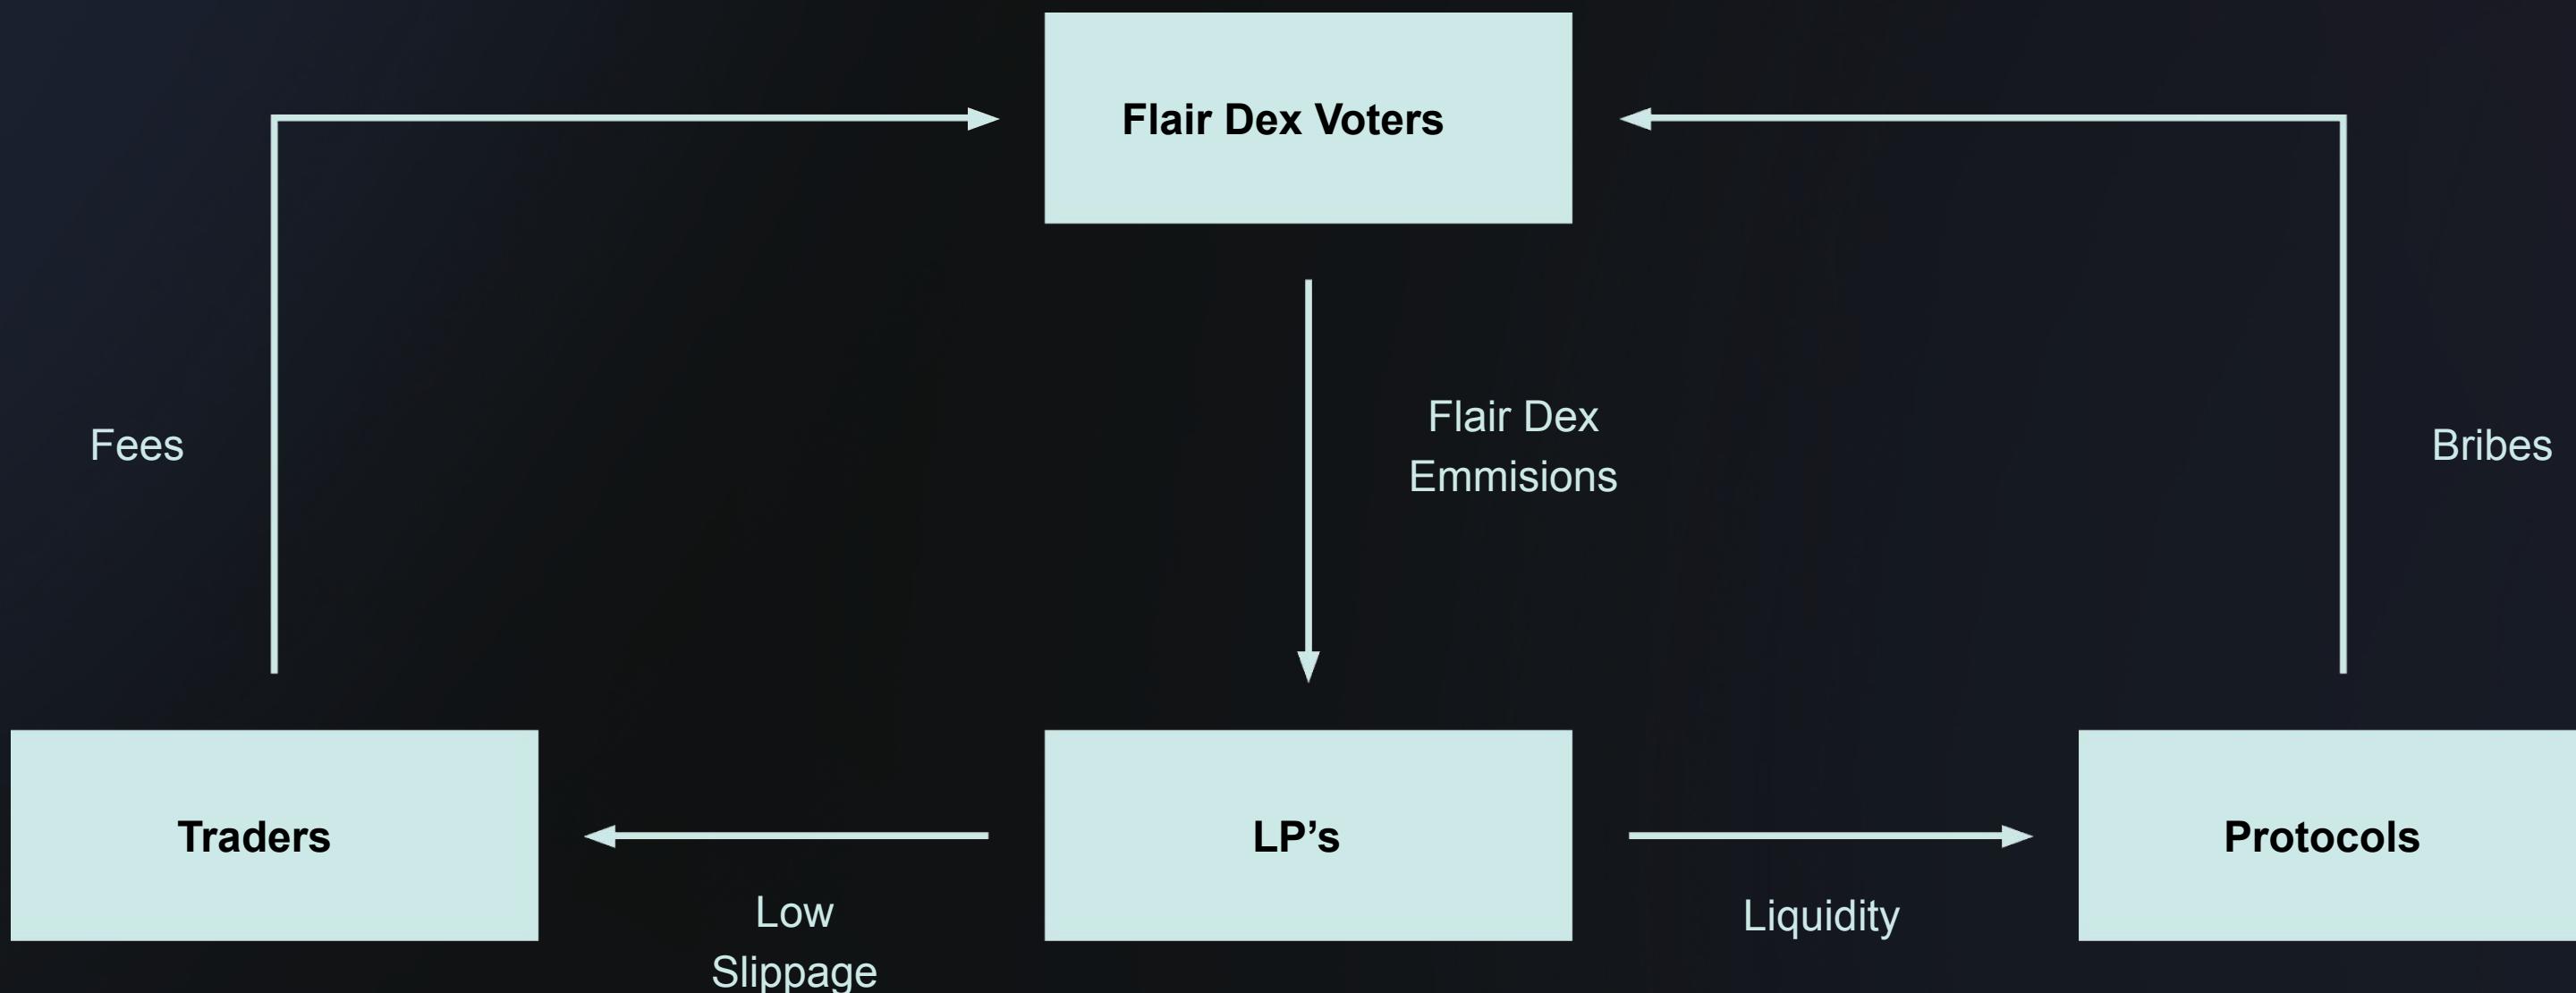

Supports both uniswap style simple Liquidity pools and curve inspired gauges.

Curve Inspired Gauges providing CRST emission to LP providers, while voters receive the fees.

Uniswap Style LP where LP providers gets the fees.

# CRUST FINANCE WORKFLOW

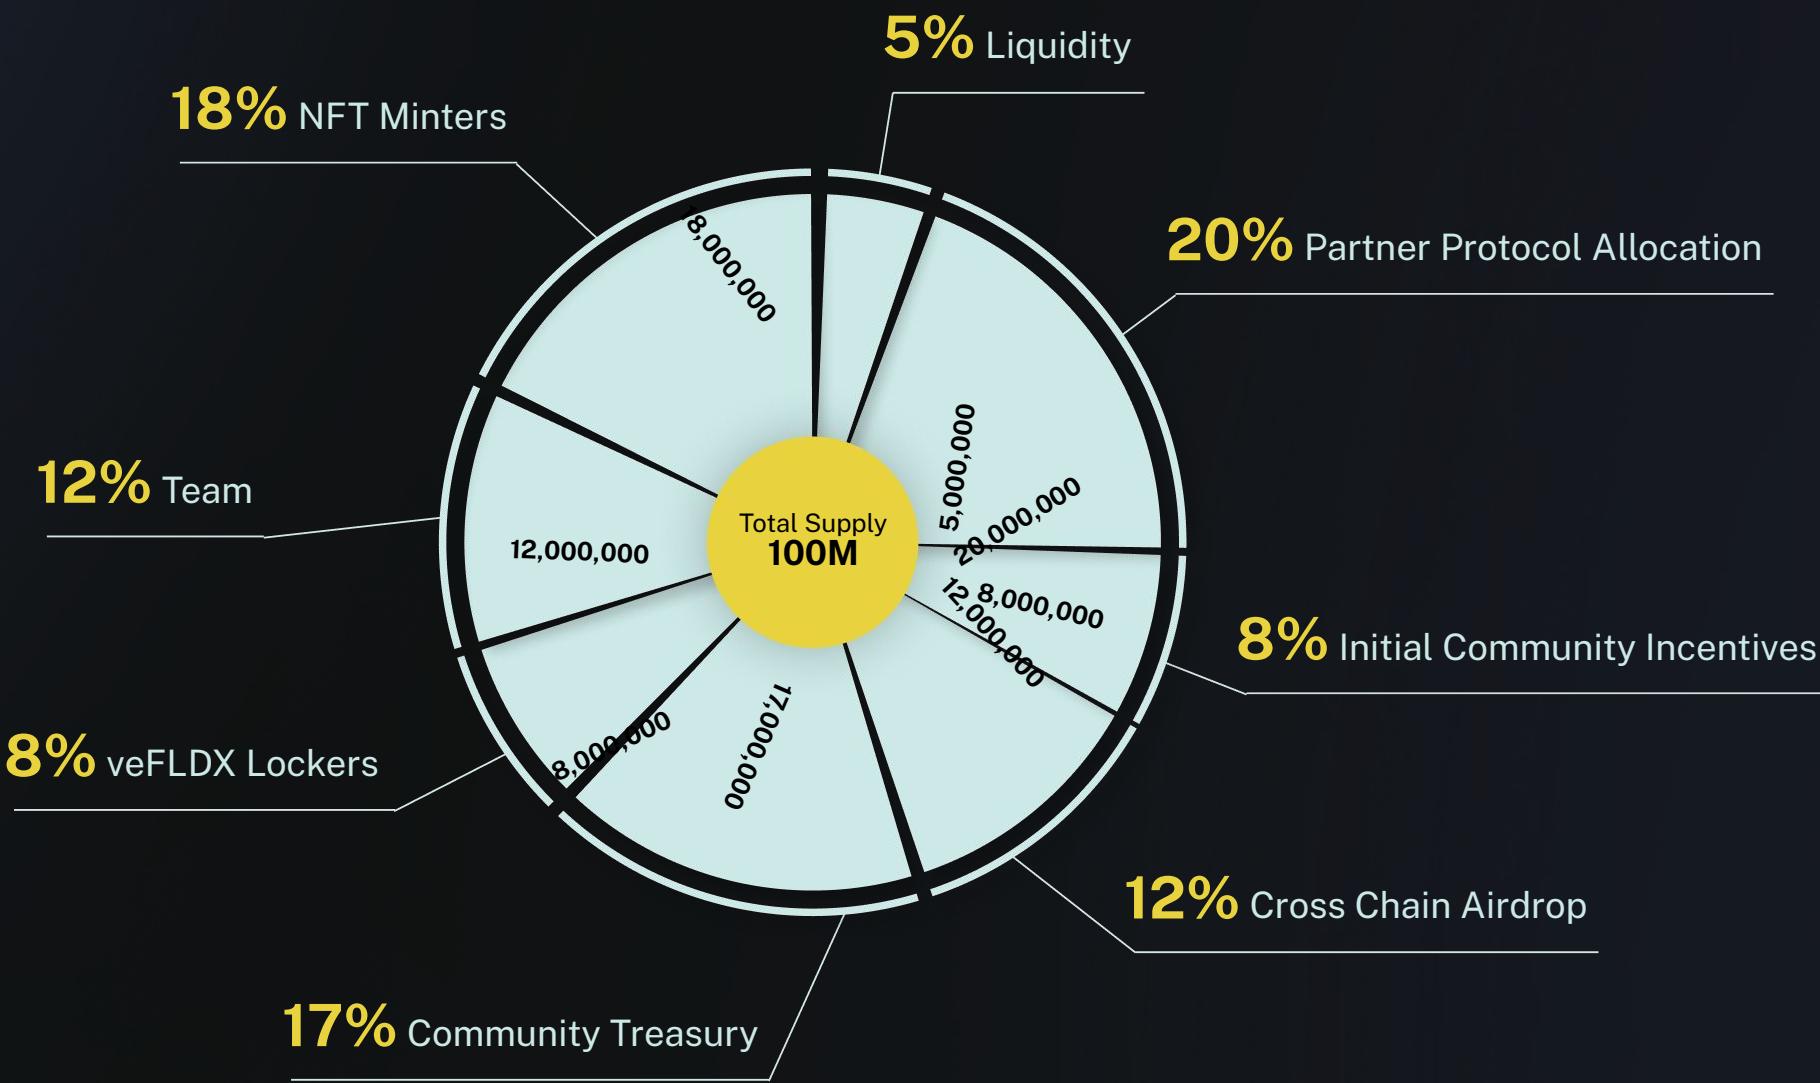

# CRUST LAUNCHPAD

Premier launchpad for projects building  
on mantle network.

Will bring additional utilities and revenue  
source for veCRST holders.

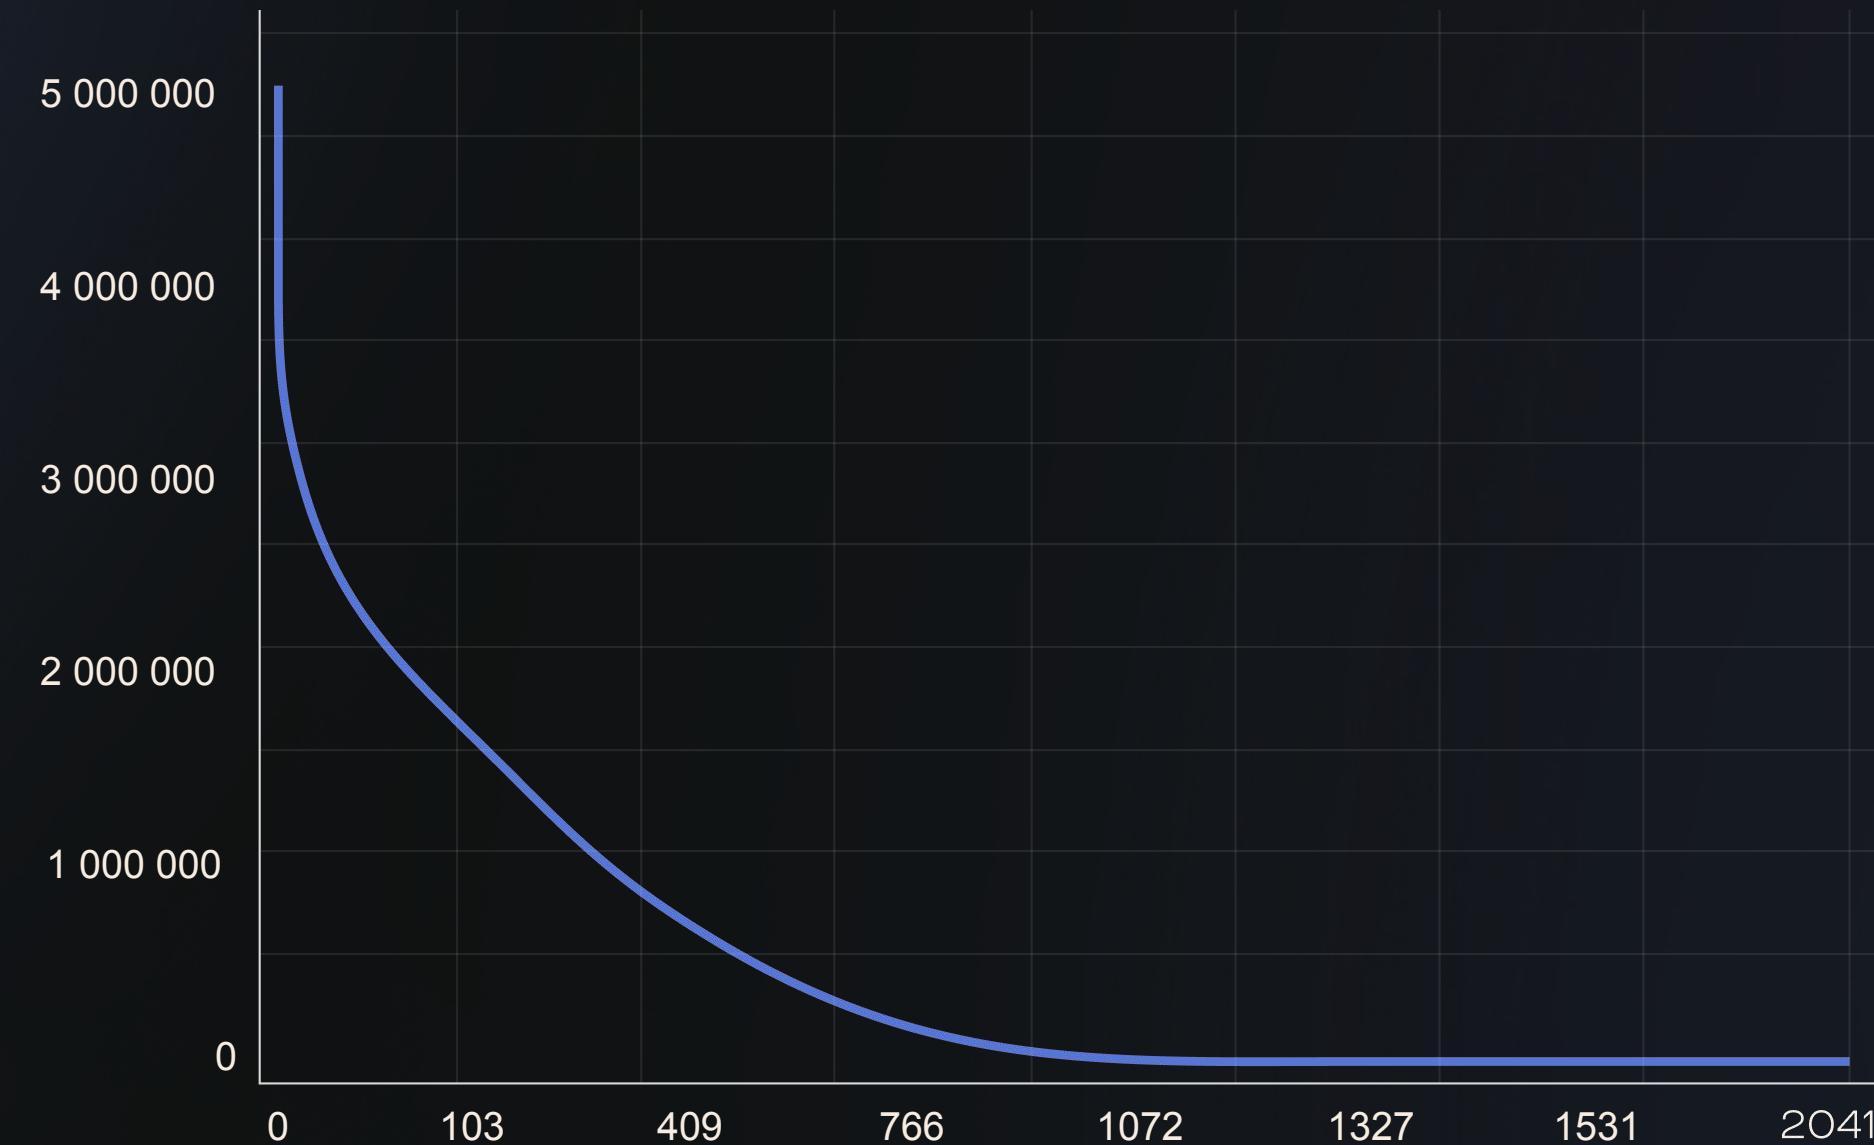

# CRUST INITIAL TOKENOMICS

Crust Finance doesn't have a fixed total supply. For a proper launch, initial sustainability and for providing sufficient liquidity we are starting with an initial token distribution of 100 Million tokens.

# CRUST EMISSION SCHEDULE

Crust Finance doesn't have a fixed total supply. For a proper launch, initial sustainability and for providing sufficient liquidity we are starting with an initial token distribution of 100 Million tokens.
